December 2019

## Principal's Message

الكلية الإسلامية في لنفورد

Assalamu Alaikum Wahrahmatullahi Wabarakatuh

بسم الله الرحمن الرحيم

Alhamdulillah, the year is ending and it is time to acknowledge the hard work of students. There are many categories of awards that are being presented at the various Award Ceremonies including High Achiever Award, Commendable Academic Achievement, Endeavour, Islamic Studies and ICAS Awards. I would especially like to acknowledge two of our Year 3 students who have achieved ICAS medals, Ayan Muhammad (for Writing) and Sameela Kabir (for Science). I congratulate all our award recipients for 2019 and look forward to achieving even better results in 2020, Insha-Allah.

I would like to congratulate and welcome our wonderful Parents and Friends (P&F) Committee members for 2020. The President is Mrs Julia Zaiton (re-appointed unanimously), Vice President is Mr Reduwan Osman, Secretary is Ms Norzie Abdul Hamid, Assistant Secretary is Ms Khalida Mohamad, Treasurer is Ms Roslinda Mat and Public Relations is Ms Ruqayyah Mohammed. Our P&F always do an amazing job fundraising for school projects. We look forward to 2020 being another successful year for the P&F as well as the College, Insha-Allah.

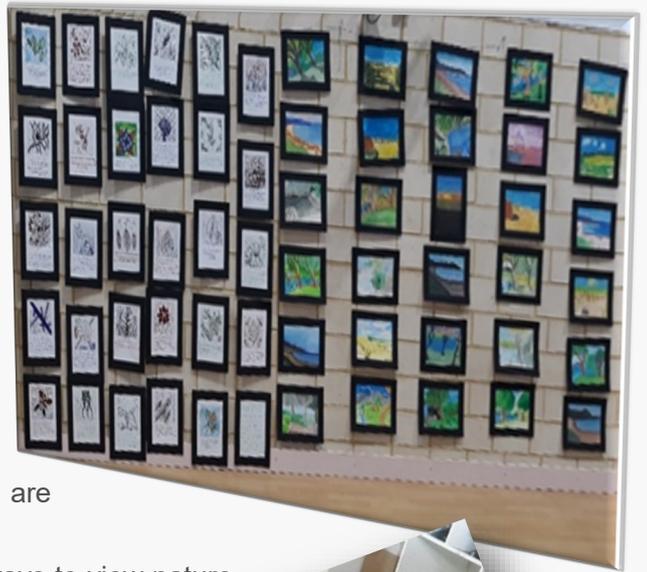

Together with acknowledging achievements, we also need to identify areas for improvement. Punctuality is of utmost importance and it is an area we need to improve on. Please be reminded that students need to arrive at school by 8:25am at the latest. Unfortunately, there is an increasing number of families who are coming late to school on a regular basis. This needs to stop in 2020, Insha-Allah. Your cooperation in ensuring your children arrive at school by 8:25am from the start of 2020 is requested and required.

Jazaak-Allahu khairan for your ongoing support and duaas.

Dr Popie Hossain Rhaman

## In This Issue

- *Visual Art*
- *Sports Carnivals*
- *What has Pre-Primary Purple been up to?*
- *Congratulations to Delson & his family!*

Art is an important part of the school curriculum. It teaches students different and unique ways of seeing the world around them, as well as how to communicate with that world. Art can make a statement, tell a story, or ask a question. By learning how to understand what art is telling them, students are better equipped to make sense of the world around them.

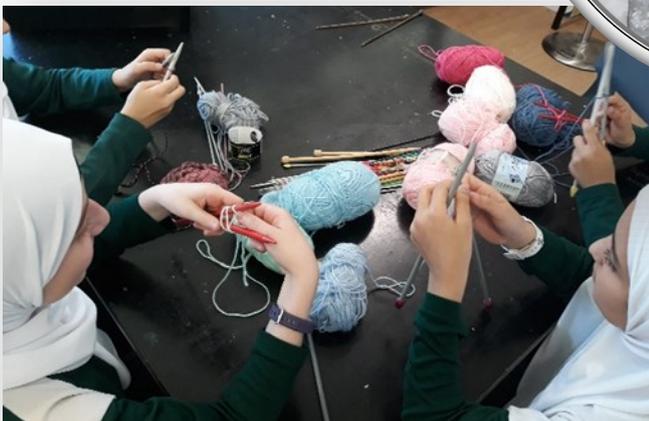

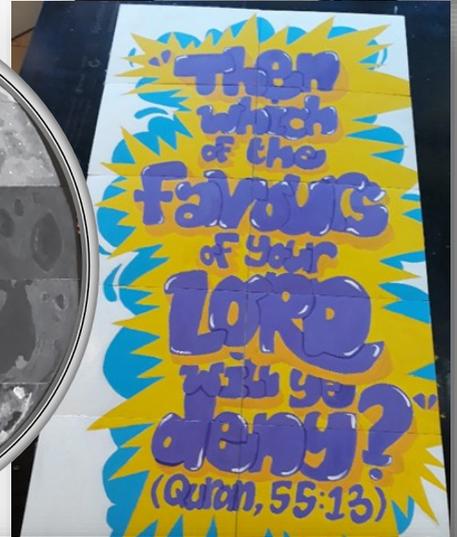

The Year 7 and 8 students have been taught about different ways to view nature and the natural world. Year 8s looked at how to visualise the texture of leaves and flowers using lino cutting and printing techniques. Year 7s studied the work of Noongar artist Bella Kelly and her famous composition style. They then created their own beautiful watercolour paintings of nature, which were displayed at the Ramadan Assembly alongside the Year 8 lino printing.

Year 9s this year have learnt about working from still life. Semester one focused on brand logos and pop art, while Semester 2 has seen them paint still life fruit and flowers in an Impressionist style.

The year 10 classes learnt about collaborative art, creating large drawings and paintings by combining many smaller pictures drawn and painted by students across different classes. The centrepiece of the high school art exhibit at the Ramadan Assembly was their beautiful full moon painting.

Art is more than just drawing and painting. This year students have also made mask sculptures with papier mache, as well as ceramic tiles, bowls and cups.

Co-curricular art has seen students experiment with high-flow acrylic painting, stencilling images over watercolour paintings, and even trying their hand at knitting!

# What has Pre-Primary Purple been up to?

What a progressive semester it has been for the Pre-Primary Purple students Alhamdulillah! All students have worked incredibly hard and furthered their knowledge across all areas.

During the semester, we have had some enjoyable events. Students enjoyed our annual Book Week as they brought their favourite book characters to life. Constable Care's visit for the kids was entertaining and educational. They were taught the importance of rules and safety. The sports carnival this term was a very fun and active experience and students really enjoyed participating.

This term in Literacy, we focused on reading and writing. We learnt a broad range of sight words which has helped us with reading and writing sentences.

In Maths, we worked on measurements, capacity, collecting data and graphing. Students worked on rotational activities which assisted in developing maths skills, fine motor skills and social skills.

As for Science, this term the focus was on Chemical Science. As part of our Science program, we enjoyed weekly cooking sessions

By: Mrs R Haddad and Mrs T Wong

where we were able to observe changes to the properties of different cooking ingredients. Students made their own butter by shaking liquid whipped cream until it turned solid, investigated what happened to popcorn kernels, icing sugar and chocolate buttons when heat was introduced and so forth. Lots of wonderful and rich language was introduced and heard throughout the term by the teachers, and students had a great time learning about chemical reactions in food as well as eating their delicious creations after!

Insaha Allah this week we will be taking part in the second part of our science incursion. We are looking forward to it!

We are so proud of our achievements and we wish our students all the best as they move on to new adventures in Yea 1!
